

OUR VIBRANT BLUE OIL COMMITMENT

PROPRIETARY BLENDS

The Vibrant Blue Oils proprietary blends are uniquely formulated to balance the body, brain, emotions and support symptoms to support optimal healing. These proprietary blends are designed to work with dietary changes, providing specific plant and herb nutrients to support healing in a bio-available form that even those with digestive challenges can easily assimilate.

THERAPEUTIC QUALITY

Vibrant Blue Oils are the highest quality, properly extracted essential oils from wild-crafted, organic plants grown in their indigenous locations. They are pure from any adulteration. As a testament to their purity, Vibrant Blue Oils are packaged in cobalt blue bottles that protect and preserve the natural energy carried within the oil.

ENHANCING KNOWLEDGE

Vibrant Blue Oils believes that essential oils are very powerful healing modalities that need to be used properly for optimal impact. For this reason, we are committed to educating health care providers and end users on the oils, their proper use and application.

ABOUT VIBRANT BLUE OILS

Hello,

I'm Jodi Cohen. As a nutritional therapy practitioner, I observed the power of essential oils to shift and balance lifestyle challenges - sleep issues, constant stress, anxiety, depression and exhaustion - and organ systems to expedite healing. Armed with that knowledge, I set out to create proprietary therapeutic blends to balance the body, the brain and the emotions, along with helping to reduce symptoms like pain, fatigue, and mood imbalances.

I recognize that a body in balance can heal. Imbalances in blood sugar, digestion, detoxification, stress and systemic inflammation (that begins with gut inflammation) can throw the body out of balance. Our oils are designed to help return these key systems to balance so the body can heal.

It is our hope that these products serve as a useful bridge to amplify the success of your other healing modalities, and with it, your nutritional practice and your clients vibrant health.

In Vibrant Health,

Jodi Cohen, NTP

ORGANIC ESSENTIAL OILS

www.vibrantblueoils.com

WHAT ARE ESSENTIAL OILS?

Essential oils are the natural, highly concentrated essences extracted from specific herbs in their living state, including plants, shrubs, flowers, grasses, fruits, bushes, seeds, roots, trees, bark and seeds. These oils contain therapeutic properties used for their healing capabilities.

HOW CAN ESSENTIAL OILS SUPPORT HEALING?

- Oils are concentrated organic whole food plants and herbs offering nutrients that are hard to get regularly in the diet
- Can support issues that are hard to address with diet and supplements alone
- Easily assimilated via topical application when digestion is impaired
- Vegan option to supplements
- Not contra indicated for medication
- Simple and sustainable for young children and those who struggle to take supplements
- Rarely have side effects

HOW DO ESSENTIAL OILS WORK?

Essential oils can help us return to our natural state of balance, known as homeostasis, so that we can heal.

Vibrant Blue Oils are specifically formulated to help balance the body, brain and emotions for optimal:

- Sleep
- Stress Support
- Digestion
- Detoxification
- Gut Health
- Blood Sugar Balance

There is a balance in nature that can be accessed by consuming nutrient-dense whole food and minerals or inhaling or topically applying essential oils derived from plants. The balance of the plant helps to balance our bodies.

Vibrant Blue Oils are specifically designed to combine the specific healing energies of different plants to match the energy of the different systems of body, brain and emotions in balance.

It has been our experience that smelling or topically applying these blends helps return our body, brain and emotions to balance. It is similar to teaching a child to ride a bike — you support the child as you balance the bike and propel the child forward, all in the effort to help the child feel the sense of balance in his or her own body. Once the child internalizes that sense of balance, he or she can take off on his or her own.

The oils provide a similar floatation-device like support, helping to keep the body, brain or emotions in balance until the body remembers how to maintain its own balance without any external support.
